SUBJECT: Change Proposal LAC-32, Sun Shade

TO: Contracting Officer

The WSPO has contacted the using organization regarding need and desirability of incorporating subject change. Comments received were definitely adverse to adoption due to the smaller size and limited improvement.

The present sun shades have been rendered satisfactory for continued use by the installation of locally fabricated metal strengthening strips.

The WSPO, therefore, disapproves Change Proposal LAC-32 as submitted. Request you notify the contractor formally of FOG's disapproval.
